

AMD FirePro™ Professional Graphics for CAD & Engineering and Media & Entertainment

Performance at every price point.

AMD FirePro professional graphics offer breakthrough capabilities that can help maximize productivity and help lower cost and complexity – giving you the edge you need in your business. Outstanding graphics performance, compute power and ultrahigh-resolution multidisplay capabilities allows broadcast, design and engineering professionals to work at a whole new level of detail, speed, responsiveness and creativity.

AMD FirePro™ W9100

With 16GB GDDR5 memory and the ability to support up to six 4K displays via six Mini DisplayPort outputs,¹ the AMD FirePro W9100 graphics card is the ideal single-GPU solution for the next generation of ultrahigh-resolution visualization environments.

AMD FirePro™ W8100

The new AMD FirePro W8100 workstation graphics card is based on the AMD Graphics Core Next (GCN) GPU architecture and packs up to 4.2 TFLOPS of compute power to accelerate your projects beyond just graphics.

AMD FirePro™ W7100

The new AMD FirePro W7100 graphics card delivers 8GB of memory, application performance and special features that media and entertainment and design and engineering professionals need to take their projects to the next level.

AMD FirePro™ W5100

The new AMD FirePro™ W5100 graphics card delivers optimized application and multidisplay performance for midrange users. With 4GB of ultra-fast GDDR5 memory, users can tackle moderately complex models, assemblies, data sets or advanced visual effects with ease.

AMD FirePro™ W4100

In a class of its own, the AMD FirePro W4100 graphics card is the best choice for entry-level users who need a boost in graphics performance to better address their evolving workflows.

AMD FirePro™ W2100

Professional graphics starts with AMD FirePro W2100 graphics, delivering optimized and certified professional application performance that similarly-priced consumer graphics lack.

AMD FirePro™ Professional Graphics for CAD & Engineering and Media & Entertainment

Innovation and reliability from a technology leader. AMD FirePro professional graphics are optimized and certified on more than 100 applications including the most popular design and engineering, and media and entertainment applications. Rigorous certification processes conducted by ISVs and OEMs test AMD FirePro graphics against a battery of simulations and real-world scenarios to ensure their readiness for demanding professional use.

AMD FirePro professional graphics drivers are released several times each year and include performance and feature improvements. Our drivers undergo a minimum of 16 consecutive weeks of testing

conducted by three dedicated quality groups. AMD quality groups perform both manual and automated testing using the most stressful scenarios our engineers are able to create, plus many challenging ones from our ISV partners and OEM customers.

In addition, AMD FirePro graphics incorporate a unique Autodetect technology. As users open new 3D applications or move between them, driver settings are automatically configured for optimized performance of supported applications, no matter what the user's workflow demands.

* Actual power measured in worst-case scenario

** DVI-D via Adapter

*** W5000 DVI option available, with 2x dual-link DVI outputs

****FreeSync is an AMD technology designed to reduce or eliminate screen tears in games and videos by allowing the monitor's refresh rate to be controlled by and synchronized to the graphics card. Requires DisplayPort 1.2a compliant monitors that support DisplayPort Adaptive-Sync and an AMD FirePro W5100, W7100, W8100 or W9100 graphics card with forthcoming FreeSync-enabled driver. Support for use with multiple monitors planned. Confirm supported technologies with system manufacturer before purchase.

AMD FirePro™ Professional Graphics for Finance and Display Wall Applications

Reliable and cost-effective multidisplay solutions.

For every need there is an AMD solution. Featuring a space-efficient, low-profile design, AMD FirePro professional graphics can be easily deployed in a variety of form factors, from small form factor desktops to tower workstations to mobile docking stations.

AMD FirePro professional graphics enable setups with multiple monitors for industries that demand high display density. AMD Eyefinity technology increases desktop productivity and simplifies visualization solutions by expanding your visual real estate up to six displays¹ with a single graphics card – an industry first.

- Supports PCI Express (PCI-E) standards (x1 and x16)
- Dedicated dual-, quad- and six-output channels for crystal-clear displays
- Supports various display connectors such as DisplayPort, DVI and VGA
- Ultimate reliability with estimated lifecycles (MTBF) of up to 500,000 hours for passively cooled cards
- Combine multiple AMD FirePro graphics cards in the same system to create large video walls

AMD FirePro™ 2270 (Dual Output)

The first low-profile, passively cooled dual-output AMD graphics card supporting all three industry-standard display technologies – DisplayPort, DVI and VGA.

AMD FirePro™ 2460 (Quad Output)

Designed for financial and corporate multidisplay users. The first low-profile, quad Mini DisplayPort-capable solution available.

AMD FirePro™ W600 (Six Output)

The industry's most powerful solution for multimonitor display walls.

AMD FirePro™ Professional Graphics for Finance and Display Wall Applications

Designed to help IT more easily configure and deploy multidisplay setups for employees. Offering ultrahigh-resolution graphics with exceptional image quality through a range of industry-standard display connectors such as VGA, DVI and DisplayPort, AMD FirePro professional graphics make it easy for IT to configure multidisplay setups using any supported monitors they happen to have on hand.

AMD FirePro professional graphics are ideal for enabling a variety of multidisplay solutions across multiple industries, including:

Financial Services
Healthcare
Transportation
Public Safety

Digital Signage
Government and Education
Control Rooms

AMD FirePro professional graphics provides certification for many leading applications, backed up by technical support to provide you with the reliability you deserve.

- *The rigorous certification processes of many leading ISVs and OEMs put AMD FirePro technology through a battery of simulations and real-world scenarios to help ensure their readiness for demanding professional use.*
- *AMD Catalyst™ Pro unified drivers deliver not only the stability and reliability that is demanded by professional users, but also the convenience and ease of maintenance that is crucial for the IT team.*
- *AMD FirePro professional graphics are backed by a no-hassle warranty and global technical support services.²*

amd.com/firepro

1. AMD Eyefinity technology can support up to six DisplayPort displays using a single enabled AMD graphics card. The number of supported displays varies by card model and board design; confirm specifications with the manufacturer before purchase. Additional hardware may be required. Utilizing DisplayPort 1.2 and Multi-Stream technology-enabled displays, connectors and/or hubs, a single graphics card may support up to two more displays than it has display outputs; limit six displays. Microsoft® Windows® 7, Windows Vista®, or Linux® is required to support more than 2 displays; Windows XP is no longer supported. AMD Eyefinity technology works with applications that support non-standard aspect ratios, which is required for panning across multiple displays. SLS ("Single Large Surface") functionality requires an identical display resolution on all displays. See www.amd.com/firepro or www.amd.com/eyefinity for details.
